

FOR IMMEDIATE RELEASE

SupplyPro, Inc. and SY-CON Systems, Inc. Deliver Consolidated Crib Management and Point-of-Use Dispensing in One Solution

SAN DIEGO, CA and EASTON, PA. – February 9, 2010 – SupplyPro, Inc., the premier provider of automated Point-of-Use (POU) dispensing solutions, and SY-CON Systems, Inc. a market leader in functional tool and & MRO inventory management software solutions, have teamed up to deliver the PCT-SupplyPro Module, a combined solution for total crib management with integration to Point-of-Use dispensing of consumables and assets on the manufacturing floor.

The new solution enables PC-TOOLCRIB, SY-CON's tool management software, to replenish SupplyPro's suite of Point-of-Use solutions from the main crib inventory and to retrieve SupplyPro transaction information for current inventory activity tracking and historical reporting. This consolidates all main crib, satellite cribs and Point-of-Use dispensing data for full reporting on usage and cost accounting to employees/departments/work orders/jobs and department budget spend.

System advantages include:

- Consolidation of activity for all inventory locations in PC-TOOLCRIB
- Seamless interface into PC-TOOLCRIB of all transactions from the SupplyPro point-of-use machines
- Quick and easy management of what needs to be refilled, and how many, using PCT-SupplyPro Administrator software
- Viewing of activity and metric reports to ensure POU machines are being used effectively and efficiently

“This is an opportunity for a full tool management solution at both the crib and Point-of-Use levels,” said David J. Simbari, President and CEO of SupplyPro. “SY-CON's crib solutions marry well with our extensive dispensing solution capabilities to provide facility-wide replenishment and reporting for a total view of consumable and asset usage.”

“Until now, crib and plant floor inventories have been separate, disparate systems,” said Michael Assia, President of SY-CON Systems, Inc., “With the PCT-SupplyPro Module, we have integrated automated, Point-of-Use dispensed inventory information and crib data for managing these inventories anywhere in the facility.”

About SY-CON Systems, Inc.

For over 22 years SY-CON has been helping customers worldwide deliver results and maximize their return on investment with extremely powerful and functional tool & MRO inventory management software solutions, exceptional customer support, and responsiveness to changing requirements. Our knowledge of inventory practices, management concepts, intuitive designs, and years of solid customer input have translated into world-class products making SY-CON a market leader. Whether it's a large manufacturing plant or a job shop, a toolcrib or only MRO inventory, SY-CON can drastically reduce expenditures and dramatically increase productivity and accountability. www.syconsystems.com, or 800.227.9266
